If you have questions please email: support@simplycoding.org

Students ages 12-18 learn how to build web pages and write software. Students **START** at level 1 - JavaScript Game Design and increase in knowledge and experience with each course. Students learn at their own pace and have the option for one-on-one help. When a student completes the pathway program they will be prepared for AP and Concurrent Enrollment Computer Science courses and a great career.
Students 9th grade and above can advance by testing out of classes

Grades 6-12
